AWS

Is a set of Amazon cloud computing tools and services. This service was officially launched in 2006 and by June 2007 AWS already had a user base of approximately 180,000 people.

The companies that use it are some such as Reddit, Foursquare, Pinterest, Netflix, NASA or the CIA, and some Spanish such as Mapfre, FC Barcelona or Interflora.

AWS History

VPC

Amazon Virtual Private Cloud, Allows you to provision a logically isolated section of the AWS cloud, where you can launch AWS resources into a virtual network that you define. You can control all aspects of the virtual network environment, including selecting your own IP address range, creating subnets, and configuring routing tables and network gateways. You can use both IPv4 and IPv6 in your VPC to access resources and applications safely and easily.
